

CORELink

Information at Your Fingertips.

Hot Key Access to Exception Information From Your CORE Screen

CORELink allows the user to instantly move from the CORE screen to the Tickler Tracking System. From the CORE screen, the user simply presses a button to find matching information within the Tickler Tracking System. CORELink accomplishes this by automatically running a query based on the information displayed on your CORE screen. This tool eliminates the need for performing a manual search, thus increasing productivity and streamlining workflow.

Start On Your CORE Screen

Press the Hot Key

Instantly View Exception Info
Within Tickler Tracking System

Why CORELink?

- ✓ Save Time - No More Manual Searches
- ✓ Increase Productivity
- ✓ Simplify the Search Process
- ✓ View Information in Seconds
- ✓ Save Steps, Just Click and View
- ✓ Reduce Duplicate Searches
